Worked example 1

Solve $5x - 10 = 20$

$$5x = 30$$

$$x = 6$$

Worked example 2

Percentage: 36 out of 48

$$36 \div 48 \times 100 = 75\%$$

How to use solved examples

- Cover the answer first.
- Try the question yourself.
- Compare your method.
- Redo the example after one day.
